

MICRON®

FAQs

What is “eco” about PIGMA Micron® Eco?

- Pigma Eco Pens are made with 75% recycled materials*
*Green Pen Barrel and Cap are 100% recycled plastic resin. Ink, ink reservoir, and nib not recycled
- Pigma Eco packaging is 100% recyclable.

How does it compare to PIGMA Micron® tan barrel?

- PIGMA Eco delivers same PIGMA® archival, fade resistant ink technology and consistently precise fine lines for detail & dependability that thinkers and creators trust.

Is PIGMA Micron® Eco Refillable?

- PIGMA Eco is not refillable because a fully airtight barrel is essential to preserving the integrity of PIGMA Micron’s ink system, ensuring consistent ink flow, a stable reservoir, and the precision users expect

Is PIGMA Micron® Eco Recyclable after use?

- PIGMA Micron Eco pens are not recyclable because they cannot be taken apart after use and separated into individual components for recycling.
- PIGMA Eco packaging is 100% recyclable.

Why aren’t all PIGMA Micron® pens made with recycled materials?

- PIGMA Micron pens require strict airtightness to maintain ink quality and precision line performance. The recycled plastic resin that meets these requirements is in extremely limited global supply.
- At this time, not enough material is available to support a full line transition.

What ink colors and nib sizes are currently available in PIGMA Micron® Eco?

- Pigma Micron® Eco is available in **black** ink only at this time.
- We currently offer best selling nib sizes **005, 01, 03, 05, and 08.**
